Setting

A color picker interface with a large color preview at the top left. Below it are two horizontal bars: one for color selection and one for brightness. At the bottom left, there are buttons for "Hex" and "# 4F46E5". To the right of the bars is a "100%" button. Below these controls is a section titled "Saved colors:" with a "+ Add" button. A grid of colored circles shows saved colors, with the last one being blue.

A circular hexagonal color palette. The main area contains a vibrant color gradient from blue to red. Below the main area is a smaller row of hexagons, including a white one, a blue one, and a grayscale gradient.
